## Welcome To Cellar Master

If you have stock management responsibly for one or more, Pub, Club, Restaurant or Hotel, however simple or complex your requirements may be, you may have found your solution.

If you are a Stock Taker, we hope that you will agree, that Cellar Master is the perfect software on which to provide your services.

### New Site

We have created this brand new site on our own web server as some organisation managed to hack and destroy our old site of 7 years. It will take some time to complete so please forgive the various designs differences and missing links etc.

### Cellar Master Micro History

Cellar Master was produced originally to assist Hoteliers, Publicans, Landlords, Bar Managers – in fact anyone who runs a Licensed Premises - with the process of stocktaking and reconciling stock consumed against income received.

Over the years we have built on this strong platform creating further market leading features and services, satisfying our broadening range of national and **international** customers.

### Hotels

Hotels are benefiting not only from carrying out regular stock checks but also from the internal movement and monitoring features with which produces detailed profit centre analysis.

Managers, who already practiced robust stock control are finessing an additional 3% beverage yield as a direct result of using the Cellar Master and its management features.

Version 5 has additional stock replenishment / ordering features including raising and printing purchase orders which enables automated delivery updates.

### Stock Takers

Cellar Master is becoming the preferred choice for Stock Takers with the combination of features and outstanding value making it the out and out winner.

Cellar Masters highly praised special features that enable you to efficiently control **kitchen stock** is offering a serious advantage to our Stock Takers, who are winning clients from others who are using old software.

### Multiple Licensed Retailers

Monitoring and controlling group stock is more important than ever in the current economic climate. Cellar Master has recently seen a growth in multiple licensed retailers selecting and now benefiting from using Cellar Master.

Our recently released version 5 enables multiple sites to be maintained simultaneously.

This includes group wide products maintenance, flexible group stock replenishment features and inter-site transfers.

### This Site

On this site, you'll find lots of useful information, about Bluestone Computing, our products, software and the ways we may be able to help you to run your business more profitably!

You can view some sample reports, watch a [Video Overview](#) about Cellar Master and download free trial software.

With optional features including direct, bi-directional integration with Sage Line 50 and EPOS functionality. Check our [Tills](#) page for more details on hardware offers and information.
